

## ChemoSampler | for acids, alkalis, detergents

The ChemoSampler was developed for sampling aggressive liquids, e.g. acids, alkalis, detergents. The samples are drawn directly into the screw-on original sampling bottle. The tamper-proof bottle closure of these bottles with original safety ring ensures unadulterated sample transport. Samples can be taken from depths of as much as 200 cm, e.g. from tanks, silos or tankers, by using the extension rod.

- ▶ PP, grey
- ▶ Resistant to acids and alkalis
- ▶ Incl. sample bottle 1000 ml
- ▶ Extension rod 100 cm and two bottle sizes available as accessories.

Attention! Make sure to pay attention to the "List of Chemical Resistance"!
